

Community College Opportunity Grants for County Vocational-Technical Schools Now Available for Adult Learners

Those with Adjusted Gross Income of \$0 to \$100,000 are Eligible to Apply

New Jersey supports residents of all ages to pursue certification in an in-demand career field by providing financial aid to students enrolled at vocational-technical schools throughout the state. Eligible students can now apply for tuition assistance at one of the participating county vocational schools in select certification programs. After completion of your course, students will be eligible to receive college credits at a select county college. Reach out to your contact below to find out where you can receive your credits.

Eligibility

Eligibility and award amounts include consideration of the Adjusted Gross Income (AGI) of either the family (for dependent students) or the student/spouse (for independent students), satisfactory academic progress as determined by the schools, and that the student has not yet earned a college degree. Interested students should reach out to the contact below to get an application and learn how to file the FAFSA. Students must apply for the fall semester by November 1, 2023 and May 1, 2024 for the spring.

Salem County Vocational Technical Schools Adult Education

Basic Welding / Welding Level 1

This Welding course will allow students to gain entry level knowledge of welding techniques and skills. Participants will learn safety regulations and basic, electrical current as it pertains to welding. The focus of this course will include welding theory and practical training in booths on steel, stainless and aluminum plates and pipes and expose participants to SMAW, GTAW, GMAW, and FCAW. Students will learn safety and proper use of machines and tools, oxy fuel cutting, plasma arc cutting, amperage, electrode sizing and numbering, basic weld joint design, and metal identification. Upon completion, students will receive a Career and Technical skills certificate and students are encouraged to join the American Welding Society (AWS).
