Course Description: (Industry: Construction Trades)

A Siemens Certified Mechatronic Systems Assistant (PT-SL1) will function as a well-grounded machine operator in a complex system, with responsibility for efficient operation of the equipment with minimal downtimes. At this level their work is carried out at plant assembly sites, workshops or in connection with service operations which utilize complex mechatronic systems.

Production Technician – Siemens Level 1 Responsibilities:

- Localize malfunctions, identify causes and sources of malfunctions, correct malfunctions where possible, and/or document malfunctions to be passed on to the appropriate experts for resolution or (where appropriate) to exchange or replace defective components.
- Recognize potential or impending malfunctions and contact expert assistance in order to keep the production line functioning and to prevent production loss.
- Perform routine, preventive maintenance
- Understand and explain the principal operations of the mechatronic subsystems in a complex system.
- Understand and explain how these subsystems work together.
- Read and understand the technical documents, reports and outlines specific to the system and subsystems, and be able to consult with experts.
- Work effectively as a team member and to coordinate their activities with upstream and downstream operations.
- Understand and implement safety regulations required for operation of the system.
